Grading Procedures:

Service Learning (Mandatory Requirement)

Student Life/SPAR endorses holistic learning and facilitates experiences in which students can grow toward their full potential. The service-learning component of the clinical hours offers partnerships between academia and community agencies and to extend learning beyond the traditional classroom. Fifteen hours of service are required. You must have approval by your clinical teacher regarding the service learning activity of your choice. The Student Life/SPAR office has contracts with many community agencies. Most places have an orientation requirement therefore, starting your hours early is recommended. There is a reflection paper due the last clinical day. Failure to meet your service learning means you did not meet the clinical objectives and would be a failure in clinical.

Evaluation of clinical performance

Evaluation of clinical performance is rated by satisfactory or unsatisfactory, and is reflected in the clinical evaluation tool. The clinical evaluation tool identifies behaviors that must be met in order for the student to achieve a satisfactory evaluation. In order to progress to the next nursing course, a satisfactory must be earned on the clinical evaluation. All students will be evaluated formally twice a semester, once at midterm and again at the end of the semester.
In the event that a student exhibits unsafe or unacceptable behavior, a Progress Record will be initiated. The student will be given opportunity to improve clinical performance. If the unacceptable behavior is continued, a Formal Learning Contract will be initiated. This Formal Learning Contract will describe the behavior, identify how the student should improve, and specify a time for the improvement to occur. If the behavior does not improve, the student will receive an unsatisfactory for the clinical course.

In addition to earning a satisfactory on the clinical evaluation tool, the student will receive a grade for the written clinical assignments, as defined by the instructor. The grade on the written assignments will determine the overall clinical grade for the course.

**Major Care Plan 50%**

If a faculty person believes a student needs to make revisions to his/her Major Care Plan or Teaching Plan the highest grade the student may make on his/her second attempt is a 70.

**Teaching Plan 40%**

**Preclinical Skills 10%**

The preclinical skills are: Peripheral Pulses, Medication Administration, Vital Signs, Physical Assessment. Below is the grading rubric for the preclinical skills:
