Course Objectives AP I
The goal of this class is to introduce students to the fundamental elements of human structure and function. Students WOULD identify, explain and apply the structural & functional concepts to the following: cellular physiology, tissue organization, integumentary system, musculoskeletal system, basic neurobiology and organization of the human nervous system, chemical communication and signal pathways (with specific reference to the endocrine system). The emphasis of the lecture portion of the class will be on the physiology and the laboratory will focus on anatomy. This class is recommended for pre-medical and pre-allied health professionals. Preparing prior to the lectures is essential for doing well in this course.

Course Objectives: Students’ Learning Outcomes (SLO’s)
After completing this course, you will be able to:

1. Relate language and terminology of anatomy and physiology together.
2. Describe how the body maintains homeostasis. Differentiate between positive feedback mechanisms and negative feedback mechanisms, give examples of each.
3. Describe tissue types, location and functions (Epithelia/Connective/muscle/nervous). Compare healthy and diseased tissues.
4. Identify the major parts of skin, skeletal joints, muscle, and the nervous system and explain the function of each.
   c. Bones Tissue: Explain how bones grow and heal. And the role of hormones on blood calcium
   d. Describe the effects of sunlight, nutrition, hormonal secretions and exercise on bone development.
   e. Name the major bones and markings of the Axial & Appendicular skeleton
   f. Identify common bone and joint diseases and compare and contrast normal with abnormal functioning of joints and bones.
5. Describe how muscle, bones, and nerves work together to create movement.
   a. Compare and contrast the structures and functions of smooth, skeletal and cardiac muscle fibers.
   b. Explain the excitation-contraction coupling process.
   c. Describe the sliding filament model of muscle contraction.
   d. Identify and describe the symptoms of common muscular diseases.
6. Explain the arrangement of the nervous system.
   a. Explain the general functions of the nervous system.
   b. Describe and explain role of the major anatomical subdivisions of the nervous system.
   c. Describe how action potentials lead to changes in the body.
   d. Examine and describe the ways that stress affects the body.
   e. Describe the structure and function of the brain and the spinal cord.
   f. Identify a damaged cranial nerve by symptom.
   g. Describe the integration between the peripheral nervous system & central nervous system.
   h. Describe common nervous system diseases.
7. Explain how the Autonomic Nervous System (ANS) maintains homeostasis.
   a. Compare the parasympathetic with the sympathetic nervous system.
   b. Describe the physiology of the ANS.
8. Name several diseases and disorders of the body and explain what causes them.

Upon completion of this course students would be able to:

1. Demonstrate effective use of anatomical terminology and demonstrate sound knowledge of anatomical structures relating to all core concepts.
2. Demonstrate sound knowledge and understanding of the underlying physiological processes relating to all core concepts.

VISTING OTHER WEBSITES
NOT RECOMMENDED
DO NOT USE other internet sites. They may have information not relevant to the content you need to learn. I placed what you need to study on the eCampus pages you will see during the semester. This will be the central source for information to help save time in linking to related material. However, if you want to waste time by searching the net for information go ahead. Any additional websites fitting the course contents would be placed under Course Documents/Topics for you.

Notice For Success:
• Pay attention to deadline dates.
• Do Not Fall behind in the schedule.
• Read all directions carefully and understand them.
• Pay attention to details

• Plan ahead!!! Plan ahead!!! Plan ahead!!! Plan ahead!!!
• The Dean of Math/Sciences/The Biology department, and or myself reserve the right to modify the scheduling and/or content of this course during the semester. (I do not foresee this happening)
This Course is a dynamic one and a work in progress.

• DO NOT wait until the last minute or hour to submit tests/assignments/take an Exam.
• I encourage you to study early and do the tests many days BEFORE they are due.
• Print pages that are important and make a note book of the printouts
• Make a study schedule and STICK TO IT. Discipline yourself about this.

Contacting Instructor
• BEST WAY TO REACH ME: email: docp1970@dccd.edu
• Call me at the office with questions about the course or anything relating to Anatomy & Physiology and your learning, reading or testing-- NOT COMPLAINTS
• OFFICE HRS: 972-273-3251. When you call leave a message. I will do my best to return the call.
Catch me during these hours—
Monday through Friday from 7:00 am-8:00am; AND PER SYLLABUS
  • Learn how to use your computer. If not, have someone else show you how. DO not call me with computer problems, please.

Responding to email. I will check my email daily. I will respond to course related questions within 24–48 hours. I will post assignment due dates in the course Modules/eCampus and through updated messages just as I would in a regular class.
Comments on formal assignments may take up to two weeks but probably less than that. I ask that you notify me when you have received critiques from me on your various assignments.

Your email Account:
Be sure to have a school email account and updated personal information on eConnect. If I sent a batch email out to you and the class for an announcement, and if it is returned (as undeliverable), I have no other way of reaching you. That responsibility is on you and not on me!

COMMUNICATION REMINDER:
You would need to be more specific in ALL future communication about the class:
  • Your Full Name
  • Course & Section #
  • Specific Question: Chapter Quiz Assignment (Ex: CHP: 26: Special Senses question # 13!)

This would allow me to go directly into your Course/Assignment, resolve the problem and respond to you much faster. There’s a several classes just like yours with 200+ students (AP I & AP II) taking my classes (Hybrid/Online & Oncampus).
I cannot identify you and what class or section you are in by your email handle.
**Discipline/ Course/ Department/Policies**

- **Late Paper (Assignment) Policy:**
  - Are due on DUE DATES, No Deadline Extension are granted for any reason(s). Late/Missed Assignments/Exams would be recorded as zero.

- **MAKE-UP POLICY:**
  - NO MAKE-UP LAB OR LECTURE EXAMS. PERIOD!! Due to time and lab space constrains
  - NO TIME EXTENSIONS FOR ANY REASON: THERE ARE NO EARLY OR LATE EXAMS
  - THEREFORE, PLAN ACCORDINGLY. POOR PLANNING ON YOUR PART DOES NOT CONSTITUTE AN EMERGENCY ON MY PART.
  - JUSTIFIABLE EXCUSE: Should you have a Justifiable Documented Excuse for missing one exam (i.e. a VERIFIABLE signed doctor's note (I WILL CALL the physician) on Clinic letter head explaining reason for your absence, Hospital Admission Notes, a funeral program with your name listed as a family or friend, or a police report saying you were in an accident, etc. at the time of the exam) at the discretion of this instructor, you may possibly replace your missed exam grade with your next exam grade but NOT for your Final exam. This may apply to one exam only.

**Student Responsibilities:**

- Please Take Responsibility for your education.
- It’s your Career, put in your BEST Effort Forth Every time & Every DAY

ACADEMIC DISHONESTY

The Student Code of Conduct prohibits academic dishonesty and prescribes penalties for violations. According to this code, which is printed in the college catalog, "academic dishonesty", includes (but is not limited to) cheating, fabrication, facilitating academic dishonesty, plagiarism, and collusion. Scholastic dishonesty includes but is not limited to cheating, plagiarism, submission for credit of any work or materials that are attributable in whole or in part to another person, photocopying an exam, taking an examination for/assisting another person, any act designed to give unfair advantage to a student or the attempt to commit such acts." Distribution of exams falls within these guidelines.

Academic dishonesty / CHEATING ON ANY EXAM WOULD RESULT IN the following sanctions, including, but not limited to:

1. A LETTER F grade from the course (not only or just from that exam)
2. INDICATED (AS CHEATING) ON YOUR TRANSCRIPT.
3. SUSPENSION FROM THE COLLEGE
**DROP POLICY**
If you are unable to complete this course, you must officially withdraw. Withdrawing is a formal procedure which you must initiate; your instructor cannot do it for you.
IT'S YOUR RESPONSIBILITY TO FORMALLY WITHDRAW.

**LAST DAY TO WITHDRAW FOR REGULAR CLASSES: 4/17/2019, FRIDAY.**
All Dallas County Community Colleges charge a higher tuition rate to students registering the third time for a course. This rule applies to the majority of credit and Continuing Education / Workforce Training courses. Developmental Studies and some other courses are not charged a higher tuition rate. Third attempts include courses taken at any DCCCD college since the fall 2002 semester. For further information, go online to: [http://www.DCCCD.edu/thirdcourseattempt](http://www.DCCCD.edu/thirdcourseattempt).

APPENDIX A

ATTAINING SUCCESS IN ANATOMY & PHYSIOLOGY CLASS

- **LECTURE:**
  - STUDY PPT LECTURE NOTES PRIOR TO CLASS & AFTER LECTURE CLASSESS
  - REFER TO TEXTBOOK CHAPTERS AS NEEDED
  - USE ONLINE CHAPTER QUZZES (GRADED & PRACTICE) FOR LECTURE REVIEW ALONG WITH DAILY STUDY, ANSWER THE QUESTIONS AS YOU STUDY DAILY, NOT TO MEMORIZE A DAY PRIOR TO TAKING LECTURE EXAMS. IT WOULD NOT WORK
  - DO NOT MEMORIZE ANSWERS TO CHAPTER QUIZZES (GRADED/PRACTICE)
  - YOU WANT TO COMPLETE THE 2 ATTEMPTS ON YOUR ONLINE QUIZZES BEFORE TAKING YOUR EXAM

- **LAB/OTHER ASSIGNMENTS:**
  - DO ASSIGNED LAB HOMEWORK ONLINE QUIZ EXERCISES PRIOR TO LAB
  - WATCH LAB VIDEOS EXERCISES PRIOR TO LAB
  - IDENTIFY STRUCTURES ON MODELS WHEN IN LAB USING LABELED PHOTOGRAPHS.
    - PAY DETAILED ATTENTION TO ORIENTATION (RIGHT/LEFT) ON THE MODEL/PATIENT
  - COMPLETE WEEKLY ASSIGNMENTS (QUIZZES/THREADS/LAB) ON TIME
  - USE ONLINE CHAPTER QUZZES (ESPECIALLY PRACTICE W/ INTERACTIVES) FOR LAB/LECTURE REVIEW
  - YOU WANT TO COMPLETE THE 2 ATTEMPTS ON YOUR ONLINE QUIZZES BEFORE TAKING YOUR EXAM

- **STUDY TIPS:**
  - Studying your Chapter notes, working your Online Chapter Quizzes as guide, etc. before class is essential for understanding the lecture.
  - Complete the appropriate Practice/Graded Chapter Quiz exercises, Interactives/Audio/Visual presentations and review the chapter before attending the lecture.
  - Use chapter Lecture outlines for taking class notes. Study groups may help. Information in this course is garnered from the text and other resources, with guidance from the instructor.
  - Students must use critical thinking to show an understanding of the material, and will not simply be spoon-fed rote information to be regurgitated on exams. Although ample memorization will be necessary, knowledge of a subject is not dependent on rote memorization.
  - Students will have to use their own initiative in using individual study skills in order to do well in this course.
  - A primary formula to any successful endeavor includes a right-minded attitude and persistent effort.
APPENDIX B
