972-860-4120

**CAMPUS ADDRESS:**
Brookhaven College
3939 Valley View Lane
Farmers Branch, TX 75244

CATALOG DESCRIPTION: BIOL 1322 Nutrition & Diet Therapy (3 Lec.)

- The Texas Common Course Number and Cross listed as HECO 1322.
- Coordinating Board Academic Approval Number 19.0501.51 09

**Prerequisite:** One of the following must be met:
- Developmental Reading 0093 **AND** Developmental Writing 0093
- English as a Second Language (ESOL) 0044 **AND** 0054
- Have met Texas Success Initiative (TSI) Reading and Writing standards.

This course introduces general nutritional concepts in health and disease and includes practical applications of that knowledge. Special emphasis is given to nutrients and nutritional processes including functions, food sources, digestion, absorption, and metabolism. Food safety, availability, and nutritional information including food labels, advertising, and nationally established guidelines are addressed.

**COURSE OUTCOME:**

This course satisfies the Tier 1 requirement for Social and Behavioral Sciences (CB080) in the 2018 DCCCD Core.

The core of learning in college is a set of courses that will provide you with the knowledge, skills and educational experiences you need to succeed in higher education. Those courses - called the Core Curriculum - lead to an associate degree from the colleges of DCCCD and transfer to four-year colleges and universities. Core courses are guaranteed to transfer to Texas public colleges and universities.

The BIOL 1322 course outcome is to help students apply basic scientific nutrition principles as well as practical nutrition information to personal life and/or therapeutic situations to enhance health, wellness, and longevity. Students will engage in a variety of activities/assessments to demonstrate learning of the course outcome (see **NOTE:** under Student Learning Outcomes below).
STUDENT LEARNING OUTCOMES /EXEMPLARY EDUCATIONAL OBJECTIVES

The learning objectives summarize the desired outcomes for each student upon completion of the lesson. Graded assessments will evaluate whether students have learned the material sufficiently to demonstrate the objectives. Therefore, students should use the objectives to guide their learning and study activities.

Students who successfully complete the BIOL 1322 Nutrition & Diet Therapy course should be able to achieve the following learning outcomes:

1. Apply nutritional knowledge to analyze personal dietary intakes, to plan nutritious meals using nationally established criteria to meet recommended goals, and to evaluate food labels and the validity of nutritional claims.
2. Trace the pathways and processes that occur in the body to handle nutrients and alcohol through consumption, digestion, absorption, transport, metabolism, storage and waste excretion.
3. Discuss functions, sources, deficiencies, and toxicities of macro- and micronutrients, including carbohydrates, lipids, proteins, water, vitamins, and minerals.
4. Apply the concept of energy balance and its influences at the physical, emotional, societal, and cellular level to evaluate advantages and disadvantages of various methods used to correct energy imbalances.
5. Utilize concepts of aerobic and anaerobic energy systems, and knowledge about macronutrients, vitamins, minerals, ergogenics, and supplements and relate them to fitness and health.
6. Describe health and disease issues related to nutrition throughout the life cycle, including food safety, corrective dietary modifications, and the influence of specific nutrients on diseases.

NOTE: Supporting Activities may include but are not limited to: Chapter Quizzes, Interactive Computer Activities, Related Activities, Discussions, Diet Analysis Project, and Exams.

INTELLECTUAL COMPETENCY/CORE CURRICULUM INFORMATION

1. Critical Thinking Skills - to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information
2. Communication Skills - to include effective development, interpretation and expression of ideas through written, oral and visual communication
3. Empirical and Quantitative Skills - to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions
4. Social Responsibility - to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.

As defined by The Texas Higher Education Coordinating Board, the Intellectual Competency of students taking core curriculum courses will be measured. Students utilize Critical Thinking, Communication Skills, Empirical and Quantitative Skills as well as show Social Responsibility in the course material. Critical thinking embraces methods of applying both qualitative and quantitative skills analytically and creatively to subject matter to evaluate arguments and to construct alternative strategies. Problem solving is one of the applications of critical thinking, used to address an identified task.

Intellectual competency is assessed in BIOL 1322 through the successful completion of a diet analysis project, answering a Food Group DAP question pertaining to food groups consumed and changes needed to improve nutrition intake. Students will utilize computer software to analyze nutrient data for three or more days, answer specific questions related to health and wellness, and
explain the challenges they will overcome to implement a personal nutrition and exercise plan. Questions on this summary analysis will combine these skills to show mastery of course content and core curriculum competencies.

**REQUIRED MATERIALS**

**TEXTBOOK:**
Textbook options are provided to allow purchasing of your preference of book format (hard cover, loose leaf, digital, bundle, unlimited)

**TEXTBOOK Title:** Understanding Nutrition, 15th edition
**Authors:** Whitney, Elli and Sharon Rady Rolfes.
**Publisher:** Cengage Learning

**DIET ANALYSIS SOFTWARE PROGRAM:** The Diet and Wellness Plus software program is used to do the Diet Analysis Project for this semester. This is an internet-based program used for a food and nutrient analysis for the semester.

**Program Title:** Diet and Wellness Plus, 1st edition
**Publisher:** Cengage Learning

**ISBN Number Options:** Options to help with cost and preference are available. You are required to have a textbook and the Diet and Wellness Plus Dietary Analysis program access.

Bundles are the least expensive way of purchasing if you have one class, Cengage unlimited is the most cost effective if you have other classes using Cengage products included in Unlimited Bundle. To check the other courses at Brookhaven College using Cengage this semester, check this Cengage website https://www.cengage.com/coursepages/unlimited_brookhaven and be sure to verify with your instructor for that course. Your Nutrition course material options:

- Cengage Unlimited Bundle * (includes digital text, Diet & Wellness Plus and any other Cengage textbook) ISBN: 9780357700013
- Hardcover text with Diet & Wellness Bundle ISBN: 9781337881500
- Hardcover text only ISBN 9781337392693
- Loose-leaf of text only ISBN: 9781337556316
- Diet & Wellness only ISBN: 9781285856230
- Diet & Wellness Plus instant access ISBN: 9781285856216

*For this Course in Cengage Unlimited: It’s important to note that this course will NOT use MindTap. If you purchase Cengage Unlimited, you will need to add the eBook for Understanding Nutrition and not MindTap to your Dashboard. The easiest way to add is to search by ISBN for the eBook which is 9780357165553.

**NOTE:** You can choose the textbook format that works best for you: eBook, hardcover, rental, own. You do NOT need to purchase Cengage Unlimited. You do NOT need a Course Key, only the code to verify your materials purchase.

**Can I use an earlier edition?**

14th edition is acceptable but not optimal and all content and assignment references are from the up to date 15th edition.)

- Previous editions will not be accepted as nutrition is not like Math or Chemistry, which is established with little changes. Nutrition is a very young science and multiple studies come out
daily. There are committees that review the most current information we have available to revise guidelines that include the most up to date scientifically proven information.

- Old textbooks contain old information and will cause a student to lose points, learn in accurate information and may become confused. The reason behind this recommendation is not just to have student purchase the newer textbook but is for the educational purpose of learning accurate information.

**Copyright content**
Publisher content is copyright protected and is used solely for the Nutrition and Diet Therapy class. This content may not be reproduced or used except for this class.

**Ordering Course Materials:**
Students may order the required textbook and software from the BHC College Bookstore or through the Internet. Be careful to order the proper items as some books sold over the internet that are not the correct ISBN number may not have all required chapters for this class. Please check your purchases carefully to assure they contain all 20 chapters that will be covered in this class.  
**NOTE: The textbook is on reserve on a first-come basis at the BHC Library Reserve desk.**

**COURSE DESIGN:**
- This course is divided into 4 units with materials for each chapter in the chapter folder. Each major exam will cover several chapters, and the final exam is not comprehensive and covers the last course chapter materials.
  - The course requires purchase of a textbook.
  - The online unit materials are designed to guide student learning through supplementary explanations of the chapter material, interactive animations, self-assessments, and connections and applications to real life.
- The online diet analysis project includes entering your food and beverage intake and answering questions based on your intake, as well as applying concepts learned from the chapter materials.
- This online course is NOT self-paced. The course calendar provides the due dates for each quiz, project part, and discussion board at the beginning of the semester. **Students are encouraged to work ahead and may complete the course early.**

**COURSE REQUIREMENTS AND ASSESSMENTS:**
There are 1000 points possible in Nutrition & Diet Therapy. The assessments in this course are designed to measure student progress toward achieving the course outcome and student learning outcomes and may include but are not limited to the following grading components:

- **Online Orientation** (100 pts, 9 activities, points earned on quiz, and discussion forum)
- **Unit Exams Online** (4 Unit Exams @ 100 pts each = 400 pts)
- **Diet Analysis Project** (11 content part areas @5 - 100 pts each = 250 pts)
- **Chapter Quizzes** (12 quizzes @ 6-10 pts each = 100 pts)
- **Nutrition Discussion Forums** – (2 discussion forums @ 50 point = 100 pts)
- **Realistic Approach Essay Assignment** @ 50 points

**Final Course Grade**
The final course grade is based on total points accumulated by the deadlines. The Course Grade will be issued according to the following 1000-point scale:

- **A = 1000 – 900.00**
- **B = 899.99 – 800.00**
Note: Number grades are NOT rounded to the nearest whole number. Grades will NOT be curved (adjusted) for students close to a cut-off between letter grades.

COURSE POLICIES:

Drop Date:
Students must drop themselves from the course. The deadline to drop the course with a “W” is July 30th.

Student-Instructor Contract
To create a course environment focused on understanding of the course content, application to the student’s life, and fostering student responsibility, both instructor and student will attempt to follow these guidelines: The instructor agrees to provide timely responses to student requests or inquiries and communicate frequently through email, online chat, course announcements, and timely grading with feedback.
In return, the student agrees to devote a reasonable amount of time and energy to successful completion of the course, to meet all deadlines, to avoid plagiarism, academic dishonesty and other forms of cheating, and to communicate frequently and clearly with the instructor, particularly when difficulties arise. The student agrees to not copy content directly from textbook, websites or other materials and must provide summaries of information, in their own words for essays, diet projects, discussion boards and any content submitted for this class.

If eCampus is down, the instructor will communicate with students via Blackboard IM and sending out emails using the eConnect system. In the case that the DCCCD email system is down, students can use my personal business email address of kat@confidenceineating.com

Attendance and Participation
Students are expected to log-in and utilize the course materials and activities in the eCampus Blackboard system on a regular basis. As a minimum expectation, you should log-in to the course at least three times per week but it is recommended you sign in daily.

As a general guideline, for a 16-week semester course, you should be actively learning through working with the online Chapter materials for about 3 hours per week (the same as attending class) and dedicate at least 3 hours per credit our additional time to studying and reviewing the lesson materials either offline or online. In total, to be successful, students should spend a MINIMUM of 12-15 hours working on course materials each week of the semester. For an 8-week course that number should be doubled, and triple for a 4-week course.

Late Work and/or Make-up Policy
All your assignments and tests are all available at the beginning of the semester to take at your own pace, up until the assignment deadline. Technical difficulties, being “busy” at home or work, minor illness, or similar problems are not acceptable excuses at any time in this course. There is no late work accepted - No exceptions, so please plan.

This course has set a schedule to complete each graded activity BEFORE the due date. All assignments are expected on or before the deadline indicated in the syllabus course calendar. Students are expected to plan to allow time to complete all graded assignments by the due date and time. The exams are to be completed by the 10:00 p.m. deadline, not started by the 10:00
p.m. deadline. Please do not wait until the last day to work on your activities that are due that day.

Problems and Emergencies: Since all your coursework is available and encouraged to submit ahead of time, there are no late submissions of any coursework. **Technical problems occurring during the last hour before an exam is due does NOT count as an emergency and is not an excuse for a late assignment.** Start exams well before the time they must be submitted to allow for technical issues that may arise.

**Grammar and Spelling**
Your work is expected to be submitted grammar and spelling free and required by the college to meet these standards. There are many programs you can use to double check your grammar and spelling. You will lose points for submitting work that does not adhere to college and state standards. If I am unable to read your work because of extensive grammar and spelling errors, you will receive a zero for your work.

**Instructor Communication and Response Time**
The primary means of communication for this class will be EMAIL. You are responsible for ensuring that your email address is correctly listed in the course (check this on the first day!) and that you are receiving emails from the instructor. To ensure you receive all notices from the instructor in a timely manner, check your email frequently (daily).

If you send the instructor an email with a request that requires a rapid response to meet a deadline, make sure to use the correct subject line and then check your email frequently between the time you send your request/problem and the due date. Extensions will NOT be granted in situations where the instructor responded before the due date with instructions, but the student did not check frequently enough to see the response or was submitted too close to the deadline for the instructor to reasonably answer the question.

The instructor will reply to all emails sent in the proper format within 24 hours on weekdays and 48 hours on weekends, but usually sooner, so double check your format and re-send your email if you do NOT hear back from the instructor within this time frame. Do NOT assume that an unanswered email was received – ALWAYS RE-SEND if you do not receive a reply in 24-48 hours! Always carbon copy yourself, so you have documentation that you sent the email to the proper email address and when it was sent. If you do not receive the email, I likely did not either.

**Technical Support or help with problems with eCampus:**
Unfortunately, problems do occur from time to time. For this reason, it is recommended to work on your assignments far in advance to allow time to solve problems.

The fastest way to get technical support with eCampus is to call 972-669-6402 or click the "Help" link at the very top of the eCampus screen and then "Submit a Ticket". Sample issues technical support can help you with:
- login not working
- eCampus unavailable for over a day
- system error messages
- system not working properly
- gradebook or a quiz not working correctly
*If the system isn't available, wait a few minutes then try again. It may be just a temporary problem. See Getting Started, Technical Support for additional information on minimizing technical problems and addressing when these problems occur.

Academic Honesty

I take academic honesty very seriously. You will likely find that class performance will benefit from discussion with your classmates. I encourage you to work with others to help clarify concepts, understand class material and to set up study groups. However, essays, exams and assignments you must supply answers with your own reasoning and words. Copying, and paraphrasing or academic dishonesty will result in an F (zero points) on the assignment, an additional 10% penalty points deduction for all individuals involved and potential referral and documentation of the case in college file.

Academic dishonesty is normally defined as, but not limited to, the following two categories:

1. **Cheating** – Using inappropriate sources of information in an assignment or on a test. The following are examples of cheating taken from real student experiences:

   **Case #1:** A student is enrolled in the Biology 1322 course. He has co-workers who have taken the same course. As the end of the course approaches, he wonders how he will find the time to get the essay assessment done and asks one of his co-workers for help. His co-worker hands him an essay that he submitted in a similar course. The student makes minor modifications to the paper and submits it under his own name.

   **Case #2:** A student is unsure about how to structure an essay. She is doing research on the World Wide Web and comes across an essay written by a student from another university. Using her computer mouse, she copies and pastes the essay into her word processor. She goes to great lengths to re-word the paper in her own style, but essentially leaves the content and organization the same.

2. **Plagiarism** – Intentional as well as unintentional failure to acknowledge sources as well as the use of commercially available so-called “research papers, website articles, blogs or posts” without full recognition of the source. Presenting as one’s own, the ideas, words, or products of another. The following are examples of plagiarism taken from real student experiences:

   **Case #3:** A student is conducting research for a Discussion Forum. He has reviewed work on the Internet. Finding helpful information, he has summarized his findings without citing his sources. He believes that minor paraphrasing is all that is necessary and that the information is likely the same information in his textbook, so he cites his textbook.

   **Case #4:** A student is writing a paper that requires her to address specific topics and problems in the assigned course textbook. She takes the information directly from the textbook with slight modification, without giving any citation. She thinks that since it is the course textbook, she doesn’t have to use quotations or citations.

   **Case #5:** A student is writing an essay that is over chapter material. The student writes the essay, using a sentence that is word for word from the textbook, without quotations and citing the source.

   **Case #6:** A student uses a few of the sentences from the textbook or another students paper, cites the textbook and page number as a source of the information and thinks this is putting in her own words and citing appropriately. After a few of the sentences the student
cites the textbook and page number as a source of the information and thinks this is putting in her own words and citing appropriately.

**Cast # 7:** A student uses mostly their own words to write content and a few sentences from a source found on the internet, does not use quotations around quote, does not reference outside source, takes content word for word from source, does not quote or changes a couple of words from the source are examples of academic infractions.

Academic dishonesty applies to all courses, assignments or exams completed by students and submitted as their own original work, whether in person or by electronic means. Your professor and college do not tolerate cheating in any form. Academic dishonesty is a serious breach of conduct with serious consequences.

**Policy & Procedure Agreement**
Continuing with the course past orientation is agreement that students have read the course policies and will adhere to the policies and syllabus. If you have any questions regarding the course policies below, please contact me immediately.

1. All work is to be submitted before 10 PM on the deadline day, 10:01 is late and will not be accepted.
2. There is no late work accepted for orientation, quizzes, and discussion boards. Minor illnesses, being busy at home or work, technical problems, internet or power outages, or similar instances are not considered for special exceptions.
3. I am encouraged to submit my work early to avoid losing points for last minute problems.
4. I am encouraged to submit my work ahead of time and can finish the course early if I desire.
5. All work is to be submitted to the links on eCampus and will not be accepted via email.
6. The grading policy and the class is based on points earned and not averages. The more points I accumulate, the better I will do in this class.
7. I have only 1 attempt to each exam, even if the directions say multiple attempts (the multiple attempts are set up in case of a technical error problem ONLY and has a set procedure to follow).
8. Reading exam directions before each exam is important to minimizing problems.
9. Technical problems must be addressed immediately with technical support if there is a problem and is no excuse for a late assignment/exam.
10. If a technical problem happens with an exam, I must address with technical support, send an email to my professor and retake the exam immediately before the deadline.
11. Discussion Forums are meant to be “discussions” among my classmates and require multiple interactions with my classmates.
12. The dietary analysis project consists of 11 content area parts, my personal nutrient analysis and sets of questions from the chapters, culminating with a final project summary essay worth 100 points that is analyzing my intake and capturing content from my textbook.
13. All my work must be double checked before submitting to confirm I am ready to have my work graded for what I submitted or did not submit.
14. The work I submit must be college level work, which is grammatically correct and spelling error free, or points will be deducted.
15. Discussion Forums and Essay assessments must use in-text citations with specific page numbers referencing my required textbook as well as a personal tie in example.
16. I must adhere to the college academic honesty policies and all my work must be in my own words as well as paraphrased and summarized work must include proper citations.
17. Academic dishonesty will not be tolerated. I will receive a zero for the assignment, plus a 10% penalty for the first occurrence. A second occurrence will be reported to school administration.
18. I acknowledge this class is a fast track course and requires increased time studying each week.

*The instructor has the right to add to, delete or revise segments of the course or syllabus.

**Online Conduct**

Students will not send unsolicited email espousing a cause, religion, or activity to other class participants and will not add other class participants to any listservs or other entity which distributes unwanted email or material.

Violation of these guidelines may result in disciplinary action against the offending student. This action can include termination of the student's participation in the class and a grade of "F".

All students enrolled in BIOL 1322 must have a functional email address and access to a computer. You should have regular, reliable access to the following software and Internet resources (access to only a mobile device is NOT enough to succeed class)

**Basic Computer Skills**

A basic level of technical competence and equipment are necessary for participating in this online class. You should already be able to perform the following tasks:

- Attach document files to e-mail.
- Complete assignments using word processing software.
- Locate, save, and retrieve files on the computer.
- Send/receive email.
- Submit comments to a discussion board.
- Save documents as a pdf
- Use a web browser like Internet Explorer or Firefox and search engines like Google.

*If you do not possess the above computer skills (or if you cannot work independently), you should be in a traditional nutrition, please request a Lateral Transfer into a traditional section BEFORE the class starts.*
