Course Title: Learning Framework
Class Meeting Time: Online
Semester Dates: March 24th-May 13th, 2020 (8 weeks)

COURSE DESCRIPTION:
This interdisciplinary course addresses (1) research and theory in learning, cognition, and motivation; (2) factors that impact learning; and (3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply learning skills discussed in the course. Students developing these skills should be able to continually draw from the theoretical models. Critical thinking serves as the foundation for different thematic approaches using a variety of academic disciplines.

Effective Fall semester 2010, students with less than 12 college level hours will be required to take and complete EDUC 1300. Please talk to your academic advisor regarding possible exemptions from this course.
