Kaplan College, Dallas, Texas

Texas Real Estate License

Teaching Experience

While working in the private sector, initiated the development of a General Manufacturing Certification program with Vernon Regional College, Vernon, Texas. The 40-hour course was designed to introduce the local workforce to the core competencies of working in a manufacturing environment. The program included the introduction to: Safety, Quality Control Charting, Basic Math/Statistics, Interpersonal Management Skills and Team Dynamics. Once completed, the course was approved by the President of Midwestern State University and I began teaching the course along with other senior management personnel through the Department of Continuing Education at MSU.

I have served on the Engineering Advisory Board at Midwestern State University with a primary focus on course review/structure to meet the needs of local industry.

In addition, I have over 25 years of experience in the private sector teaching various in-house and off-site, training classes and workshops to line, staff and senior management.
